SUMMARY

Front-End Developer with 3+ years of experience in **React.js, HTML, TypeScript, and JavaScript (ES6+)**, specializing in user-friendly and high-performance web applications. Skilled in **UI/UX design, state management (Redux, Zustand), and REST API integration**. Proficient in **SCSS, Tailwind CSS, Material-UI, Mantine, and Shadcn UI**, with experience in **Git and Jira**. Strong collaborator in cross-functional teams, dedicated to writing **clean, maintainable code for scalability and performance**.

EXPERIENCE

NEXON Dev VINA   District 7, HCMC

Frontend Developer   April 2022 – Present

TLM (Text Localization Manager)   March 2024 – Present

- Project Description: Website for managing translation data. The project focuses on the **Master Sheet** (similar to an Excel table), the central storage and workspace for managing translation data.
- Responsibilities:
  - Transform designs into React UI components, collaborate with backend developers to integrate APIs for project management (Master Sheet stored per project). Handle import/export sheet data, real-time content and translation status updates via socket, supporting single-word edits and bulk changes. Translation overview (progress bars display translated vs. total words by status). *Ticket management* (integrated into Target cells to assign translation tasks or monitor progress per language).
  - Join peer code reviews with team members.
  - Debug and resolve issues in the frontend codebase.
- Technologies used: Typescript, React, Redux, Tailwind CSS, Shadcn, Zustand.

NxTranslator   April 2023 – August 2024

- Project Description: Developed a translation website supporting text, image, and file translation with project-based management. Integrated Term Base (TB) for terminology standardization and Translation Memory (TM) for storing and reusing translations.
- Responsibilities:
  - Build UI based on requirements and collaborate with backend developers to integrate APIs for *Term Base management, translate images, images storage management, handle uniformity* (detecting and proofreading content for the sentence).
  - Participate in code reviews to ensure quality, performance, and best practices.
  - Debug and resolve issues in the frontend codebase.

- - o Maintain and refine the UI based on user feedback.
  - Technologies used: Typescript, React, Redux, Tailwind CSS, Mantine.

QMS (Quality Management System)   April 2022 – June 2023

- Project Description: A TaskManagement Website for QA that helps quality assurance teams efficiently track and manage their tasks. The system supports three types of QA tasks: Functional Testing, Link Testing, and Performance Testing. Users can create, edit, view, assign, and comment on tasks, ensuring smooth collaboration and workflow management.
- Responsibilities:
  - o Build the UI based on the design and integrate APIs for the task request form, while creating shared components for task forms.
  - o Replace components using MUI Material with Mantine.
  - o Maintain and refine the UI based on user feedback.
- Technologies used: Typescript, React, Redux, Mantine

SUMVIET Company   Thu Duc, HCMC

Frontend Developer Intern   May 2021 – August 2021

- Contributed to development of Ecommerce projects
- Technologies used: Javacript, React JS, HTML, CSS, SCSS

EDUCATION

Post and Telecommunications Institute of Technology

Software Engineering   Good Classification   Graduation: August 2023
